WORK EXPERIENCE

Senior MERN Stack Developer with 4+ years of experience in designing and developing scalable enterprise applications using MongoDB, Express.js, React.js, and Node.js. Skilled in building responsive user interfaces, secure RESTful APIs, authentication systems, workflow automation modules, and real-time web applications. Experienced in working on enterprise billing and revenue management platforms with exposure to SAP BRIM-related business processes, subscription management, invoicing, and order-to-cash workflows. Proficient in JavaScript, Redux, Tailwind CSS, SQL, Microservices, AWS, Docker, Kubernetes, and CI/CD pipelines. Strong understanding of scalable system architecture, reusable component development, API integrations, and performance optimization for production-ready enterprise solutions.

ZENVORA PVT. LTD.

Sr. Software Engineer

May 2024 – Present

- Developed scalable AI-powered enterprise applications using FastAPI, Python, and microservices architecture.
- Built RAG-based and LLM-powered solutions for document processing and workflow automation.
- Designed REST APIs and backend services for real-time data processing and enterprise integrations.
- Implemented monitoring and alerting using Prometheus, Grafana, and CloudWatch.
- Deployed containerized applications using Docker, Kubernetes, and CI/CD pipelines.

Technologies: Python, FastAPI, AWS, MongoDB, Langchain, RAG, Docker, Kubernetes, Grafana, REST APIs.

PATCH LINE LLP

Software Engineer

Dec 2023 – May 2024

- Developed enterprise web applications and scalable backend APIs for workflow automation systems.
- Built responsive frontend modules and integrated REST APIs for real-time operations.
- Worked on authentication systems, reusable components, and performance optimization.
- Collaborated in Agile/Scrum environments for feature development and deployments.

Technologies: React.js, Node.js, Express.js, MongoDB, Redux, Tailwind CSS, REST APIs.

Software Engineer

RIDDHI-SIDDHI

- Developed predictive analytics and enterprise backend systems using Python and machine learning models.
- Built REST APIs and cloud-based monitoring systems using AWS services.
- Designed business dashboards and automated infrastructure management workflows.
- Worked in Agile/Kanban environments with cross-functional teams.

Technologies: Python, TensorFlow, PyTorch, MongoDB, AWS, REST APIs, Ansible, DevOps.

PROJECTS

Enterprise Subscription & Revenue Management Platform

Feb 2025 – Present

- Developed a subscription and billing management platform for enterprise revenue operations and customer lifecycle workflows.
- Built microservices for subscription management, invoicing, payment processing, and order-to-cash workflows.
- Integrated enterprise billing APIs and SAP BRIM-related business processes.
- Deployed scalable services using Docker, Kubernetes, AWS, and CI/CD pipelines.

Technologies: FastAPI, Node.js, MongoDB, React.js, AWS, Docker, Kubernetes, REST APIs, SAP BRIM Concepts.

AI-Powered Product Intelligence & Support System

May 2024 – Feb 2025

- Developed an AI-powered customer support and product recommendation platform using LLMs and RAG pipelines.
- Built conversational assistants using Langchain, GPT APIs, and vector databases.
- Designed scalable FastAPI microservices and deployed them on AWS infrastructure.

Technologies: Langchain, GPT-4, Claude, FastAPI, AWS, FAISS, ChromaDB, Docker.

Dynamic Pricing & Demand Forecasting System

May 2024 – Dec 2023

- Developed a real-time pricing and forecasting platform for hospitality businesses.
- Built predictive analytics models and backend APIs for pricing optimization and booking analytics.
- Automated deployments and cloud infrastructure using Kubernetes and Terraform.

Technologies: Python, Django, Flask, PyTorch, MongoDB, AWS, Docker, Kubernetes, Terraform.

Guest Experience & Feedback Automation System

Dec 2023 – June 2022

- Developed a GenAI-powered customer engagement and feedback automation platform.

- Built NLP-based sentiment analysis systems and chatbot solutions for customer support.
- Automated deployments and monitoring using cloud and DevOps tools.

Technologies: Python, Flask, NLP, PyTorch, MongoDB, AWS, Docker, Kubernetes, Terraform.

EDUCATION

BU University BHOPAL Graduation 2020

ADDITIONAL

Skills:

JavaScript, TypeScript, React.js, Node.js, Express.js, MongoDB, Redux, Tailwind CSS, RESTful APIs, Microservices, JWT Authentication, FastAPI, Python, GenAI, LLM Models, NLP Models, RAG Pipelines, Langchain, Prompt Engineering & Tuning, System Design, SDLC, AWS (S3, SNS, SQS, DynamoDB, IAM, CloudWatch, EC2), Docker, Kubernetes, Jenkins, CI/CD, Git/GitHub, Redis/Elastic Cache, PostgreSQL, MySQL, Linux OS, Prometheus, Grafana, Terraform, Ansible, Agile Methodologies, Scrum, Kanban, Client Handling, Team Management, SAP BRIM Concepts, Subscription Billing, Order-to-Cash, Revenue Management.
